We attach photostat of letter dated September 30, received from Mr. H. L. Finch, regarding a complaint about contaminated water coming from our plant.

We realize that contaminated water means different things to various people, but we believe it would be advisable for you to look into the situation and establish what the contamination consists of and determine if there is any practical means of reducing the flow of such water over Mr. Goldblatt's property.

Very truly yours,

*[Signature]*  
R. J. Boyle
